Muhammed Raafat El-Garf Software Test Engineer

muhamedelgarf2@gmail.com Muhammed Raafat El-Garf Muhammed Raafat El-Garf Portfolio
Zahraa Nasr City 01006896936 Exemption

PROFILE

Software Testing Engineer with hands-on experience in Manual Testing, Automation Testing, and API Testing for web applications. Experienced in designing and executing test cases, validating APIs and databases, and ensuring software quality through effective testing practices across real-world testing projects. Passionate about continuous learning and leveraging AI technologies to improve testing efficiency, accelerate testing processes, and enhance software quality.

EDUCATION

Bachelor's Degree in Computers and Information 2024
Department: Computer Science Overall Grade: Good New Cairo, Egypt
Graduation Project: TidoPay – Mobile Wallet Application
Graduation Project Grade: Very Good

EXPERIENCE

Software Testing & Automation Trainee | Next Academy 03/2026 – 09/2026 Nasr City
- Completed practical assignments and testing tasks covering Manual, Automation, API, and Database Testing using SQL, including designing and executing test cases, creating bug reports, and applying ISTQB-based functional, negative, boundary, regression, and risk-based testing techniques and Soft Skills.
- Worked on Manual, Automation, and API Testing Projects, including Guru99 Banking System, DemoBlaze, Automation Exercise (E-commerce Website), and Automation Exercise API, designing and executing test cases and validating application functionality and API behavior
- Applied testing techniques including BVA, EP, Decision Tables, State Transition, Static Testing, and Risk-Based Testing, while using Jira for defect tracking and collaborating within Agile teams.

Freelance Manual Tester | Upwork 11/2025 – 02/2026 Remote
- Performed Manual Testing for E-commerce Websites and Banking Systems, analyzing requirements and business workflows.
- Designed and executed test scenarios and test cases covering Functional, Positive, Negative, Boundary, and Regression Testing.
- Identified, documented, and reported software defects with clear reproduction steps, expected and actual results.
- •Performed Retesting and Regression Testing to validate bug fixes and ensure application quality.

Software Testing Engineer Trainee | Edges for Training 06/2025 – 10/2025 Nasr City
- Completed training in Manual and Automation Testing, including test case and test scenario design and execution for web applications.
- Performed Bug Reporting and Defect Tracking and gained practical knowledge of Automation Testing fundamentals and SQL for Database Testing.
- Applied software testing concepts through practical training activities and assignments.

Change Management Engineer | Orange Egypt 01/2025 – 07/2025 Benha
- Reviewed network change requests, assessed risks and potential impacts, and supported change management processes to ensure service continuity and minimize operational risks.

Health, Safety, and Environment Engineer | Redcon Construction 08/2023 – 12/2024 Ismailia
- Led site safety activities, conducted risk assessments, and ensured compliance with HSE procedures, safety standards, and documentation requirements.

SKILLS

Testing Skills
- Manual Testing
- Functional Testing
- Regression Testing
- Test Case Design
- Test Scenario Design
- Bug Reporting & Defect Tracking
- Database Testing
- SQL

Development Tools
- Eclipse
- MySQL
- Workbench
- Apache NetBeans
- Notepad++

Automation & API Testing
- Selenium WebDriver
- TestNG
- Maven
- Page Object Model (POM)
- Postman
- REST API Testing
- Allure Reports

AI
- ChatGPT
- Prompt Engineering

Programming & Data
- Java
- OOP
- JSON
- HTML5
- CSS3

Soft Skills
- Communication
- Teamwork & Collaboration
- Problem Solving
- Attention to Detail

QA & Collaboration Tools
- Trello
- Jira
- GitHub/ Git
- Google Sheets

PROJECTS

Automation Testing Project – Automation Exercise (E-commerce Website)
- Developed a scalable UI Test Automation Framework using Java, Selenium WebDriver, TestNG, Maven, and POM, with reusable components, and automated 26 end-to-end test scenarios using JSON-based data-driven testing, Maven/TestNG execution, and Allure Reports.
- **Tools & Technologies:** Java, Selenium WebDriver, TestNG, Maven, POM, JSON, Allure Reports, Eclipse
- **GitHub:** https://github.com/muhammed-elgarf/automation-exercise-ui-automation

Automation Testing Project – Swag Labs (E-commerce Website)
- Developed a UI Test Automation Framework using Java, Selenium WebDriver, TestNG, Maven, and Page Object Model (POM) with reusable BaseTest and BasePage classes, and automated end-to-end workflows covering login, cart operations, and checkout using JSON test data, TestNG XML for regression execution, and Allure Reports.
- **Tools & Technologies:** Java, Selenium WebDriver, TestNG, Maven, POM, JSON, Allure Reports, Eclipse.
- **GitHub**: https://github.com/muhammed-elgarf/Swag-Labs-UI-Automation

Manual Testing Project – Guru99 Banking System
- Performed comprehensive Manual Testing by analyzing functional requirements and business workflows, designing and executing test scenarios and test cases for core banking functionalities, and conducting Functional, Positive, Negative, Boundary Value, and Validation Testing, while documenting defects and maintaining bug reports and test execution reports.
- **Tools & Technologies:** Microsoft Excel, Google Sheets, Manual Testing, SDLC, STLC, Bug Reporting.
- **GitHub:** https://github.com/muhammed-elgarf/Guru99-Bank-Application-Manual-Testing

Manual Testing Project – DemoBlaze (E-commerce Website)
- Performed Manual and Functional Testing for authentication, product catalog, cart, checkout, and navigation workflows, designing and executing positive, negative, boundary, validation, and end-to-end test cases, documenting defects, and maintaining test execution reports.
- **Tools & Technologies:** Manual Testing, Functional Testing, Regression Testing, Test Case Design, Bug Reporting, SDLC, STLC, Google Sheets
- **GitHub:** https://github.com/muhammed-elgarf/demoblaze-manual-testing

API Testing Project – Automation Exercise API
- Performed REST API Testing using Postman, covering products, brands, search, authentication, registration, and account management through GET, POST, PUT, and DELETE, with positive, negative, and parameter validation, validating status codes, response bodies, headers, response times, and API behavior.
- **Tools & Technologies:** Postman, JSON, HTTP Methods, REST API Testing, API Validation, Bug Reporting.
- **GitHub:** https://github.com/muhammed-elgarf/automation-exercise-api-testing

Tidopay Mobile Wallet Application – Graduation Project
- Performed Manual and Mobile Testing for a mobile wallet application, designing and executing test cases for authentication, OTP verification, wallet recharge, QR payments, transactions, balance inquiry, and bilingual support, with Functional, Regression, Negative, and Edge-Case Testing, defect reporting, fix validation, and ISTQB-based testing practices.
- **Tools & Technologies:** Manual Testing, Mobile Testing, Functional Testing, Regression Testing, Test Case Design, Defect Reporting, ISTQB
- **GitHub:** https://github.com/muhammed-elgarf/Tidopay-Mobile-Wallet-Application-Graduation-Project

TRAINING & CERTIFICATIONS

National Telecommunication Institute (NTI) - Next Academy
Graduation Project: Automation Testing Project-Automation Exercise(E-commerce Website)

Software Testing Diploma - Edges For Training
Graduation Project: Automation Testing Project-Automation Exercise(E-commerce Website)

COURSES

- Software Testing Course – **Udemy**
- Manual Testing Course – **QA cart**
- Introduction to Software Testing Concepts & Techniques – **ITI Platform (Mahara-Tech)**
- Effective Test Case & Bug Report Writing Techniques – **ITI Platform (Mahara-Tech)**
- SQL for Testing – **Dragons (Self-Study)**
- Prompt Engineering & AI from Scratch – **Udemy**
- HTML & CSS – **ITI Platform (Mahara-Tech)**
